

Anton Bogomazov

Senior Backend Software Engineer

abogomazov.dev@gmail.com • linkedin.com/in/abogomazov • t.me/antonbogomazov

Software Engineer with 4 years of experience in web technologies and Kotlin, with a strong background in real estate, e-commerce, and platform solution development. My focus on maintainability, fast delivery, and correctness enables businesses to accelerate time to market and reduce future development costs. Based in Belgrade, Serbia.

Experience

Senior Kotlin Software Engineer, Holland and Barrett

Jan 2024 - Present

British-based multinational chain of health food shops with over 1,300 stores in 16 countries.

- Replaced a vendor solution by developing an in-house A/B testing service, resulting in significant cost savings for the company.
- Improved SSR rendering and layout management platform, reducing the time required to launch new services.
- Led the development of an HR platform for feedbacks and performance reviews, increasing employees productivity from 7.9 to 8.1.

Skills: Kotlin, Spring Boot, Microservices, Kafka, Amazon Web Services (AWS), API Design, Extreme Programming (XP), Architecture, TestContainers, Flyway.

Senior Software Engineer, Setronica

Aug 2022 – Jan 2024

Software development company, partnered with Tradeshift, leading B2B supply chain platform and marketplace. Worked in one of Tradeshift's core teams (product catalog).

- Stabilized product catalog import for a B2B marketplace to save 2 contracts with important partners.
- Unblocked feature development for a legacy service by adding test coverage and refactoring critical modules.
- Trained a group of 8 developers switching to Java to address talent shortages on the project.

Skills: Java, Python, JavaScript, Amazon Web Services (AWS), Serverless, Extreme Programming (XP), Testing, Architecture, Data Engineering, ElasticSearch.

Senior Kotlin Software Engineer, Beeline

Apr 2022 - Aug 2022

One of the largest telecom companies in Eastern Europe, with a revenue of 4.65 billion USD (2018) and a team of 28,500 employees.

- Designed a system to migrate millions data records from legacy systems to a centralized repository, resolving data inconsistency and conflicts within the company.
- Implemented continuous delivery and testing practices, increasing release frequency from weeks to days.
- Improved the business critical service architecture, reducing the features time-to-market by 25%.

Skills: Kotlin, Spring Boot, Microservices, Kafka, Postgres, jOOQ, CI/CD, REST, API Design, Architecture, System Design, Kotest, Test-Driven Development (TDD), Functional Design (FP), Data Engineering.

Kotlin Software Engineer, Domclick

Dec 2020 - Apr 2022

A real estate service enables users to buy, sell and rent properties with an annual turnover exceeding 135 million USD, attracting 15.6 million monthly visits.

- Designed pledge property and mortgage services, increasing product revenues by 6%.
- Saved developers 1 hour/day by automating everyday engineering tasks such as artifact delivery.

Skills: Kotlin, Java, Spring Boot, Microservices, REST, Postgres, Hibernate, RabbitMQ, Rest-assured, Liquibase.

Education

Computer Science, Ecole 42 Moscow Campus

Dec 2019 - Jan 2021

General practitioner, RZGMU Medical University

Sep 2014 - Aug 2019
