EXPERIENCE

Kotlin Software Engineer, Holland and Barrett

January 2024 - Present

British-based multinational chain of health food shops with over 1,300 stores in 16 countries.

Software Engineer, Setronica

August 2022 - January 2024

International software development company with extensive expertise, including eCommerce, online marketplaces, ERP, and eProcurement.

- Maintained a mature system with multiple programming languages for both backend and frontend (java, js/ts, python) in a cloud-based business network and supply chain payments platform.
- Provided engineering support for data science projects.
- Led mentorship project for Java engineers.

Lead Kotlin Software Engineer, Beeline (VimpelCom)

April 2022 - August 2022

One of the largest telecom companies in the CIS region, with a revenue of 4.65 billion USD in 2018 and a team of 28,500 employees.

- Led and trained a team of 6 engineers in the development of an application for aggregating users and services data.
- Refined the service's inherently flawed architecture.
- Introduced CI/CD, development and testing practices.
- Delivered and deployed the first releases.
- Migrated over 30,000 data records from legacy systems and resolved conflicts.

Kotlin/Java Software Engineer, Domclick

December 2020 - April 2022

A real estate service enables users to buy, sell and rent properties with an annual turnover exceeding 135 million USD, attracting 15.6 million monthly visits.

- Designed pledge property and mortgage services, increasing product revenues by 6%.
- Improved DX by automating everyday engineering tasks such as artifact delivery, saving developers 1 hour/day.
- Tuned service performance to increase the availability up to 99.95%.
- Resolved over 20 customer escalations and 4 critical production incidents.

Content Manager, Ultimate Guitar

August 2017 - December 2020

One of the world's largest websites for musicians, attracting over 50 million monthly visits.

- Created over 1,000 top-notch scores and arrangements for the Official Tabs project.

SKILLS

Engineering

Object-Oriented and Functional Design Principles

Domain-Driven Design

Extreme Programming

Programming Languages

Java, Kotlin, Python, JS, C

Frameworks

Spring, Ktor

Databases

Postgres, Hibernate, jOOQ,

Exposed, Liquibase

Testing

JUnit, Kotest, ArchUnit,

Rest-assured, Selenium

Messaging

RabbitMQ, Kafka

DevOps Tools

Docker, Kubernetes

Monitoring and Logging

ELK, Grafana, Prometheus,

Zabbix

EDUCATION

Ecole 42 Moscow Campus

Computer Science

December 2019 - January 2021

École 42 is a private institution of higher education in CS, based on peer-to-peer and project-based learning.

RZGMU Medical University

General practitioner

September 2014 - August 2019

Studied natural and medical sciences.

LANGUAGES

English, Full working proficiency

Russian, Native
